

## ABT Exhibiting at AOTA's 90th Annual Conference This Year

Please visit us in **Booth #800** to say hello, ask questions, and to experience any of our products that you may not be familiar with yet.

Sheila Allen, MA, OTR will also be presenting a seminar on TLP at Booth #1231.

**When:** Saturday, May 1

**Time:** 1:00 - 1:45

**Title:** *The Listening Program: Listening to Help Improve Living*

**Description:** The Listening Program® (TLP), a music listening therapy developed by Advanced Brain Technologies is used by occupational therapists worldwide to enrich the programs of clients of all ages and abilities. Increase your awareness of the effects of sound/music on yourself, and be introduced to the psychoacoustic underpinnings of TLP. Learn about current technological advances (highlighting the use of enhanced bone conducted sound), and cross-cultural applications of TLP after over a decade of use in a wide variety of settings including homes, schools, clinics, hospitals, workplaces, and the military.

**The AOTA Conference is taking place April 29-May 2, 2010 in Orlando, Florida at the Orange County Conference Center.**

**For more information, here is the link to Conference registration details:**
