

By completing any of The Listening Program[®] (TLP) Provider Training methods the attendee will be recognized as an Authorized Provider of The Listening Program. Continuing education units will be earned and a certificate of completion will be sent to the Provider following the training course.

2 Day TLP Provider Training

The 2 Day Course provides an introduction to the physiology and psychology of listening and integrated with discussions on auditory processing. The historical development and theoretical basis of the TLP method will be presented along with new advancements designed to improve sensory processing.

Receive 12 Professional Contact Hours

3 Day TLP Provider Training

This 3 Day Course expands on the 2 Day curriculum with a more comprehensive review of TLP, clinical reasoning skills, program planning and the introduction to the benefits of bone conducted auditory stimulation.

Hosted at the ABT Training Center in Ogden, Utah, this small group setting encourages a more dynamic and interactive learning environment under the facilitation of TLP developer and ABT founder, G. Alexander Doman.

Receive 23 Professional Contact Hours

Distance TLP Provider Training

This self-paced, hands-on course provides comprehensive study modules which develop the core knowledge in the theory, program structure and program planning.

This training method also includes your personal listening program experience, program planning consultations with three clients, preparation of a case study, and coaching from your TLP Provider Mentor.
